

# HYBRI-FIBER MOP SOLUTION

## Solution #1: Ease of Use

- Stab and go
- Mop head latches on to microfiber like Velcro
- Simply pull off after application
- Lightweight, reusable, launderable

## Solution #2: No Quat-Binding

- In a recent trial use conducted by our current client, it was noted that less chemical was used because what was applied went further
- Reduce cross contamination: SOP 2 mops per patient room, 1 mop per bathroom
- Improved germ kill rate

## Solution #3: Cost Savings

- Multiple uses out of 1 mop
- Inventory management by City Uniforms and Linen to avoid over-purchasing

## How Does It Work?

1. HACCP trained Customer Service Rep's pick up and delivery mops.
2. Washers are loaded according to soil classification, weight, and chemical formulation.
  - Healthcare Products are washed at 160 degrees for more than 25 minutes using Gurtler Chemical formulas.
  - Gurtler Chemical conducts periodic audits of formula to ensure effectiveness.
3. Once cleaned, mops are ATP tested for quality assurance.
4. Clean laundry is poly-bagged to protect from cross contamination.
5. Customer Service Rep's deliver clean, ready to use microfiber.

## Advantages of City Uniforms and Linen

- City stays on the leading edge of technology
- Offer up-to-date training and education
- Personalized services to meet needs

## Industry News

In a recent survey conducted by industry experts, it was found that a majority of infection control practitioners do not trust their hospital's laundering system. Thus leading to a move towards disposable mops. This move has caused City Uniforms and Linen to offer and promote an industry leading solution, Hybri-fiber.

Production facility at Westfield Drive
